PROJECT SUMMARY

Telus Test Automation | Bengaluru

Nov'24-Present

Organization : Telus Digital
Designation : Software Quality Assurance Team Leader
Roles & Responsibilities:

- Led and managed manual QA team members, ensuring effective task allocation, mentoring, and delivery ownership across releases
- Migrated environment mocking from a licensed tool to open-source WireMock, resulting in significant cost savings (thousands of dollars in licensing)
- Designed and developed a custom WireMock framework from scratch, achieving comparable performance to licensed solutions
- Led Agile ceremonies and coordinated cross-team QA activities across sprint cycles
- Owned release readiness including migration testing, regression strategy, and production sign-off

PREVIOUS PROJECTS

Metro Bank | London & Bengaluru

Oct'20– Nov'24

Organization : Wipro Ltd.
Designation : Test Manager
Automation Tool/Technologies : Appium with Java, Maven, TestNG, Sauce Labs, GIT
Roles & Responsibilities:

- Managed 6 QA teams delivering large-scale UK banking programs
- Defined enterprise-level test strategy, governance model, and release quality gates
- Ensured compliance with UK banking and regulatory standards
- Reduced defect leakage through KPI-driven quality tracking
- Mentored and performance-managed up to 14 QA engineers across multiple teams
- Acted as primary QA stakeholder for UK client leadership
- Hands-on contributor for mobile automation (Appium + Java) on critical releases

8x8 Work | Bengaluru & Romania

Mar'18-Oct'20

Organization : Wipro Ltd.
Designation : Senior Test Engineer
Automation Tool/Technologies : Appium with Java, Maven, TestNG, Sauce Labs, GIT
Roles & Responsibilities:

- Led a team of 5 for automation and regression testing.
- Improved regression suite execution time and framework stability.

Organization : Oracle India Pvt Ltd
Designation : Quality Assurance Engineer
Automation Tool/Technologies : Java, Selenium, Gherkin, Cucumber
Roles & Responsibilities:

- End-to-end testing & automation of enterprise products
- Worked across Windows, Linux, Solaris environments
- Automation using Selenium, Java, Cucumber (BDD)

Organization : Cognizant Technology Solutions
Designation : Programmer Analyst
Automation Tool/Technologies : ASP.NET, Oracle
Roles & Responsibilities:

- Development & testing of asset management applications
- Strong foundation in SDLC, client delivery, and enterprise systems
